

Management's Guide to: Scanning & New Technology

Online Course

This 1.5 hour online course covers essential information needed by collision repair managers to make decisions about scanning and other new technologies. Each module offers a management perspective on:

- What it means to scan
- Types of scans
- Types of scan tools
- OEM positions
- OEM vs Aftermarket
- Identifies Resources
- Printable content and materials
- Much more

This course will provide two credit hours toward all AMi professional designations, including Accredited Automotive Office Manager (AAOM), Accredited Automotive Manager (AAM), Accredited Master Automotive Manager (AMAM) and upcoming Accredited Collision-Repair Estimator (ACE) and Accredited Master Collision-Repair Estimator (AMCE).

To learn more about this course and management perspectives on future hot topics, sign up at: www.amisignup.org and simply search "scanning".

Hear directly from
Industry experts and
